

Reverse mount smd led

Product Description

Now only SMD 1206 led have reverse mount type, it also have full color: red, orange, yellow, yellow-green, green, blue, white bicolor and tricolor. This type led often be used for gaming keyboard.

Package Description

■ Package Dimensions:

Notes:

1. All dimensions are in millimeters (inches).
2. Tolerance is ± 0.10 mm (0.004") unless otherwise specified.

PRODUCT PARAMETER

LED Size	3.2*1.5*1.1mm
Color	RED
Wavelength	625nm
Forward Voltage	1.8-2.4V
Forward Current	20mA
Luminous Intensity	60-140mcd
Packaging	3000PCS

PRODUCT DETAILS

1. Chip, use large size regular square chip

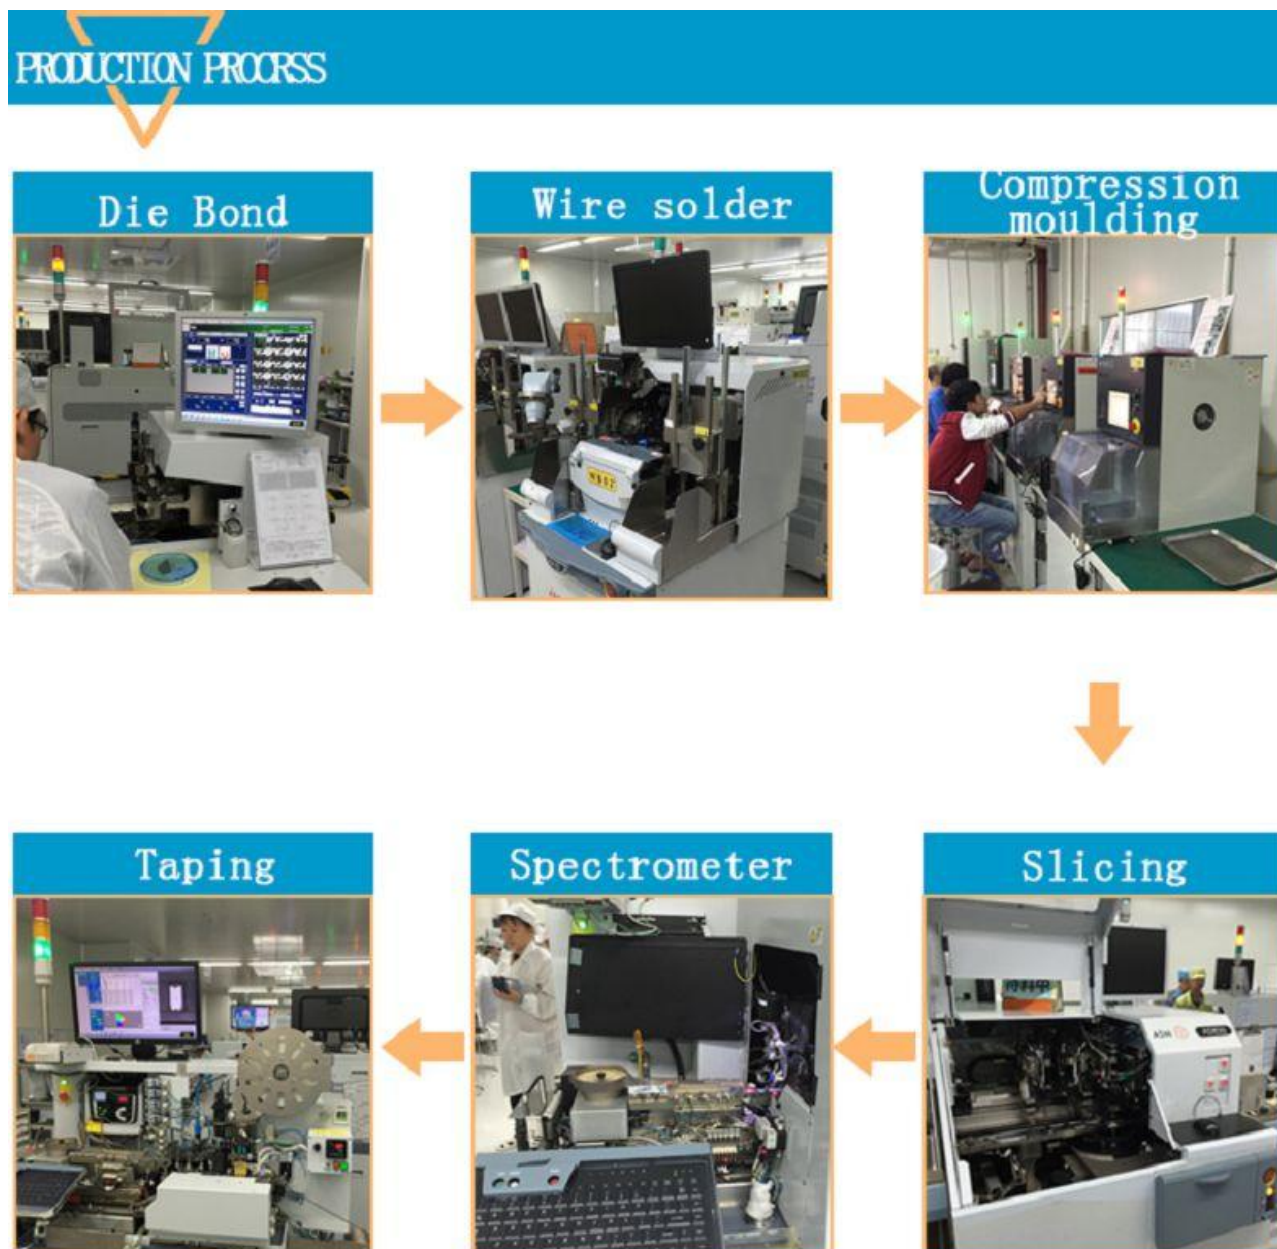

2. Epoxy, use low light decay and high stability imported epoxy resin

reverse mount smd led Features:

- 1.Package in 8mm tape on 7” diameter reel
- 2. High intensity and reliability
- 3. High quality, low power requirement and low cost
- 4. IC compatible and easy assembly
- 5. Meet SGS certification
- 6. ESD 2000V
- 7. Compatible with automatic placement equipment

Production for reverse mount smd led

Reverse mount 1206 LED chips diode SMD LED specifications using the most advanced full ASM solid crystal, wire automatic equipment, automatic sub-BIN taping machines and other fully automatic equipment; products in the design fully take into account the LED light, electricity, thermal characteristics, the use of imported low-light fade water package , The selection of raw materials used are verified by the reliability of the experiment, the product is more stable, high anti-ESD ability, low light decay, good consistency and so on.

reverse mount 1206 smd led have full color, welcome to your inquiry!

reverse mount smd led Information and Production Line

Dongguan Zhiding Electronics Technology Co., LTD is a high-tech enterprise specialized in manufacturing, designing and selling high quality LED lighting and LED related products. Zhaoqing Factory has more than 1000 employees, including more than 80 technicians focused on research and development. The factory has fully automatic production machines, the international general test equipments, and excellent equipment reliability experiment. From materials in storage, to process design, to product manufacture, each production process is in strict operation accordance with the ISO9001 quality assurance system. Besides our existing molded products, We also can provide customized products.

We have advanced testing equipment, can be "normal temperature continuous light lifetest", "high temperature and high humidity cycle test", "cold and hot shock cycle test" and "high and low temperature storage test", "high temperature continuous light test", "salt spray test" and reliability test, for all kinds of product reliability test of periodic on a regular basis, provides the high quality for our product quality assurance.

PRODUCTION ENVIRONMENT

Our service:

If you have any more special requirements, just contact us. We have professional manufacture and team in the LED field; and we will try our best to achieve your expectation.

We going to give reply in 24 hours when we got your opinions and requirements.

In order to maintenance our products, we set up own independent R&D department for after-sales service , and it also develop more high-tech products.

We have well-trained and experienced staffs to answer your all questions in fluent English and Chinese.

We offer two-year's warranty period for all products and provide free technical guidance services at any time.
